Radiology :

01/08/2023

X-RAY CHEST - PA VIEW

Findings :

Cardiac size is normal.

Hila are normal.

Lungs are clear.

Domes and CP angles are normal.

Bony cage and soft tissues are normal.

IMPRESSION : NORMAL STUDY

03/08/2023

ULTRASOUND WHOLE ABDOMEN

Indication : Health check up

Findings :

Liver: Normal in size(15 cms), outline and shows increased echotexture. No focal lesion seen. No intrahepatic biliary dilatation. CBD is normal. Portal vein is normal.

Gall bladder: Moderately distended and shows increased wall thickness measuring 5 mm. No calculi. No evidence of any pericholecystic collection.

Pancreas: Normal in size and echotexture. No mass lesions. Pancreatic duct is not dilated. No evidence of any intrapancreatic or peripancreatic fluid collections.

Spleen: Normal in size (11.4 cm) with normal echotexture. No focal lesions. Splenic vein is normal in caliber. No obvious collaterals seen at the splenic hilum.
